J. M. ALLEN SINGING

The people of this community met on the 2nd Sunday afternoon for the purpose of singing God's praises in the good old Sacred Harp.

The house was called to order by chairman, singing three songs.

Lesson by four—three songs each, singing two songs.

Three songs each: Alex Strickland, Ole Wilson, J. V. Wain, G. W. Strickland. Recite ten minutes.

House called to order by chairman, singing two songs.

Lesson by four—three songs each: E. R. Stevens, C. R. Thibault, J. W. Wiles, A. Bartholomew, S. H. Thibault and A. Lowery.

Closed by chairman. Dismissed by Rev. English.

There will be an all-day sing at Mission Cross Road the 29th day of May, in remembrance of J. M. Allen's birthday. Everybody is especially invited to come and bring a well-filled basket.

R. C. Lowery, Chairman.  
Julius Allen, Secretary.

**GRAVE YARD WORKING**

There will be a grave yard working at Rosin Ridge, Saturday, May 25th. Everybody interested is sure to come and bring tools.

W. C. Madsen, Com.

Forty per cent of the milk produced in the United States is made into butter.

## BRADSHAW ITEMS

On May 18 and 19 Rev. J. E. Plant filled his regular appointment and delivered three good sermons, receiving one member Saturday.

Baptizing Sunday morning, which was well attended. The church is very glad to have Brother Lunsford join its ranks of service, and we bid him God speed.

We are glad to say that we are having a good Sunday School at Mt. Gilthead and we invite every one who will to come and join in with us every Sunday at 10 o'clock, and also come to our B. Y. P. U. every Sunday night at 7 o'clock.

Just here we would like to invite everybody to come to Mt. Gilthead first Saturday in June to our semi-annual Seven Shape Singing Convention and bring your 1922 books and a well-filled basket, and enjoy the day in song service.

We are looking forward to our summer revival which will begin on Saturday before the 3rd Sunday in July. We invite everybody to attend and hope to have the best meeting ever held here.

Everybody is asked to come to the cemetery working next Thursday morning, May 23.

The church will operate a cold drink stand for the benefit of the church at the singing on the first Saturday, and we ask that no others bring a stand.

Early one morning  
The river was rising.  
The river came out.  
And went flowing about.

It came to town  
With a leap and bound.  
The airplanes were flying.  
The children were crying.

The boats were rowing  
Where the water was flowing.  
The people had nothing to eat.  
But plenty water to wash their feet.

The water went down  
Out of the town.  
The people were found  
Who were thought to be drowned.  
By Hugh Prescott, 6th Grade.

The normal whale is said to weigh about a ton to each foot of length.

## CARD OF THANKS

In this way we want to thank our friends of New Brockton and Enterprise for their assistance, deeds of kindness, expression of sympathy and love during the sickness and death of our wife and mother.

We especially thank Dr. Bush for his attentiveness and everyone who was so thoughtful for the beautiful floral offerings. May God's love and mercy ever guide each and every one of you.

W. C. Johnson and Family.  
Mrs. Ruby Ridenour and Family.  
New Brockton, Ala.

Thursday, May 23, 1929

## Arm Of Negro Is Jerked From Shoulder, Lives

DOHAN, Ala., May 18.—James Barnes, negro, whose arm was jerked from his shoulder Wednesday afternoon when his hand became entangled in an electric clothes wringer at the Dothan Steam Laundry plant, will recover, hospital authorities report today.

Barnes, an employee of the plant, apparently stumbled and fell against the machine, leaving his hand to go inside of the wringer. When his arm became entangled he was thrown over the machine to the floor on the other side and his arm jerked loose from his shoulder, literally pulled out of the socket.

We take this method of extending our sincere thanks to the people of Elba and community for their deeds of kindness and expressions of sympathy during our recent bereavement. The illness and death of our husband and father, A. B. Wain, we also wish to thank Mrs. Brannon and Ballard and the entire personnel of the Covington County Hospital for their services.

Mrs. Ella Wain and Children.

**NOTICE TO TAXPAYERS**  
The Board of Review of Coffee County has completed its work of review, and the assessed valuation of all property for taxation has been fixed as by law provided. Notice is hereby given that the tax return lists showing thereon such assessed valuations are in my office and open for public inspection.

The Board of Review will sit at the Court-house of Coffee County, at Elba, on the first Monday in June, 1929, to consider such protests as may be filed by any taxpayer as herein provided. Any taxpayer who is not satisfied with the valuation of his property as fixed and entered on the return list as returned herein, may file objections in writing to such assessed valuations with the Secretary of said Board, on or before the first Monday in May, 1929. And the taxpayer shall set out in such objection filed, the description of each item of property and his reason for making objections to the assessed valuation as placed thereon.

Done this, the 6th day of May, 1929.  
D. C. MARLEY,  
Tax Assessor, Coffee County.  
M9-16-23.

## Hiring a New Office Boy

The ideal business organization is one where, when an officer of the Company leaves, there is a general advance all along the line; a new office boy is hired and the machine is complete in every detail.

It is toward such an ideal that Alabama Power Company is striving.

In the selection of employees great care is taken to get men who may be developed for positions of responsibility and trust. The results of this policy are to be seen by taking a careful check of the officers, department heads and managers of this Company. These men have come up through the ranks, many from the lowliest beginning. They have won preferment by unusual fitness, by sheer ability and mastery of the particular work entrusted to their care.

It is this spirit of pure democracy which has made the organization of Alabama Power Company what it is today—a big, loyal, hard-working group of men and women, bound together by mutual respect, ambition and recognition of their duty to themselves, the stockholders and the public.

The men in the ranks of Alabama Power Company have constantly before them the examples of those now directing the Company's activities. They know that there is an open road ahead, and that for the men who show unusual aptitude in any department of the business, unusual ability to vision the future, or to direct the immediate, there are no limitations placed upon advancement. Such men, taken from the ranks, will be the directing heads a few years hence.

This spirit, permeating the personnel from the top to the bottom, keys the entire organization to a pitch of efficiency which enables Alabama Power Company to render a superior service to its customers throughout Alabama.

## ALABAMA POWER COMPANY

# Pea River Power Company

In connection with the change which has just taken place in the management of this Company and of its affiliated Companies, an extensive program of improvements in plant and equipment has been commenced.

Within forty-five to sixty days normal service and adequate power will be available for all purposes of its patrons and when the full program is completed the Company will be in a position to take its proper place in the development of industrial and other activities in the Community which it serves.

The Company is appreciative of the tolerance shown by its patrons during a period of great difficulty and on its part now pledges itself to the most speedy establishment of conditions which will fully satisfy its customers.

It is our privilege to serve you---  
It is our purpose to serve you well

Here's where  
a car leads a tough life

NO General Motors car is turned out of the factory until a fleet of exact duplicates of that model has been found good by the engineers at General Motors' Proving Ground. Such an advance model must prove itself from stem to stern. The tests involve speed, power, endurance, braking, riding comfort, handling ease, fuel, oil, and tire economy; body strength—every phase of car construction and performance. It's a tough life. Such testing would be beyond the means or resources of an individual. 1268 acres of land at Milford, Michigan, are devoted to this outdoor laboratory where hills are steep and roads are vicious. Men who are among the world's best automotive engineers conduct the tests. This tested performance is as much a part of a General Motors car as the chassis. You can't see it. You don't pay extra for it. But you know it as you give the car long use on the road.

## GENERAL MOTORS

"A car for every purse and purpose"

General Motors (Dept. A), Detroit, Mich.

Please send me, without obligation, information on the new models of the products I have checked—(circle with your name illustrated book "The Open Road")

- ☐ CHEVROLET

DECOLIGHT Electric Plants—Q-Way Systems. Provide all electrical conveniences and labor-saving devices for the farm.

All General Motors products may be bought on the lowest GMAC Time Payment Plan.

## Born Blind In Montgomery, Woman Is Made To See

A woman, born blind 48 years ago in Montgomery, has been operated on and made to see for the first time. This interesting story comes from New Orleans, and is as follows:

The world is a miracle to Mrs. Betty Anna Wagoner, who has been blind for 48 years, and now seeing upon the unknown to her from her ward in Charity hospital here.

Receiving her first sight through an operation, the first marvel to Mrs. Wagoner was the fact of a live arm being, the nose, the eyes and mouth of the surgeon, which she had only known through touch.

She next called that her son visit her so that she might view his countenance.

"I clenched my hands and tried not to scream," the patient said, as the bandages were being removed from the right eye and saw, "It seemed like a blessing too great to come to me after all these years. I thought what it might mean to see my son who is 19 years old, to learn to read books. My husband has been dead for years and I wondered how he looked."

Mrs. Wagoner was born blind in Montgomery, Ala., 48 years ago. Five months ago she became ill and was brought to the hospital for an operation. While there a life-threatening disease became convinced that unless the muscles of the eyes had atrophied from years of non-use she could be made to see.

Successful on the right eye, the same operation was applied to the left, which still is bandaged.—Troy Messenger.

## A Bank Account

is not only a LUXURY but a NECESSITY to a Successful Business Man

Do you know of a man or woman who is conducting a Successful Business without the assistance of a Bank Account?

No matter what line of business you are engaged in—farming, merchandising, teaching, clerking, or one of the professions, you should have an account with a bank—THIS BANK.

## Ridin' Pretty on Goodyears

Talk To Our Goodyear Users Hereabouts

WHO makes the best tires today?

All facts now unmistakably point to one make of tire as outstandingly the best. We refer to Goodyear.

Clever advertising long ago ceased to sell tires. Car owners have had too much experience to be led by "claims." Most tires are bought today on the basis of their proved performance.

This explains why MILLIONS MORE people ride on Goodyear Tires. Producing millions more tires than any other company, Goodyear is able to give you a very much better quality and yet charge no more.

When urged to accept another tire as "equal to" or "better than" a Goodyear, PLEASE REMEMBER THE FACTS. Don't be "talked out of" the World's Greatest Tires.

## The New Goodyear Pathfinder

Rugged—fine appearing—generously over-sized! That's the NEW Goodyear Pathfinder, and it wears as well as it looks.

Every bit of material used in those big, sturdy tires is carefully selected and thoroughly tested. The rubber is blended to obtain the standard uniform toughness of Goodyear treads and sidewalls. All materials must meet Goodyear's rigid standards. Goodyear exports measure for fine quality every bale of cotton used in Goodyear mills. Again when the cotton leaves the mill as Goodyear Supertwist Cord, it is tested. All through its building each tire is well tested—inspected—watched to assure high quality.

No wonder Goodyear Pathfinders are GOOD. We'd like you to see these tires. You'll appreciate their value. You'll appreciate their low cost. Just glance at the price for your size.

POOR ORIGINAL

## HIGHWAY BUILDER FALLS TO DEATH

OPP, Ala., May 18.—B. M. Thompson, highway foreman, fell to his death from a second story window of a local hotel here today. Mr. Thompson, apparently 38 years of age, came to Opp from Barry, Ala., about five weeks ago and was foreman of some work being done on the highways near here. He went to the dining room of the hotel today, but it was noted that he did not eat anything. They added to your system vigor, vitality and strength.

## E-A-T BERMUDA ONIONS Because

## THE NEW FORD ROADSTER

## The New Ford Has A Remarkable Engine

THE engine of the new Ford embodies many new mechanical features. It is unusual in performance because it gives quick acceleration, smoothness, speed and power without sacrifice of reliability and economy.

The design of the cylinder head is just one of these in this performance. Others are the specially designed carburetor, the new hot-spot manifold, the carefully planned large valve diameter, the chrome alloy valves, the aluminum pistons, the statically and dynamically balanced crankshaft and flywheel, and the simplicity of the electrical, ignition, cooling, lubrication and fuel systems.

Of special importance is the manner in which engine vibration is absorbed before it reaches the chassis of the car, thereby preventing unpleasant vibration periods.

This is done in the new Ford through the introduction of a flexible front end support that is both simple and practical—a truly remarkable improvement in engine mounting developed after many months of testing and experimenting.

Drop in some day soon and inspect every detail of the Ford engine. You'll call it one of the sweetest mechanical jobs you've ever seen.

### Mothers Day Program

A beautiful and impressive Mothers Day program was rendered at the Methodist Church Sunday, May 19th. It was one week late, as we do not have preaching at our church on the second Sunday. The following program was rendered:

Song, "Mother's Blessing," Mrs. Ginter and Mrs. Geo. McElwain.

Song, "Memories of Mother," by the choir.

Prayer, by Rev. Welch.

Song, "How I Miss My Mother," Mrs. D. L. Polson and Mrs. George McElwain.

Reading, "Mother," Jarrell Fleming.

Musical Reading, "Rock Me to Sleep Mother," Jessie Lucile Polson.

Song, "Tell Mother I'll Be There," Mrs. W. H. Ward and Mrs. Herbert Jones.

Sonnet—Rev. D. L. Polson paid beautiful tribute to mothers living and dead.

Many of the old songs, such as "Rock of Ages," "On Jordan's Stormy Banks I Stand," "How Firm a Foundation," "Amazing Grace," were sung by the congregation.

At the close of the service all persons over 60 years of age were called to the front and asked to stand in line and with a united voice sang "Rock Me to Sleep Mother," by Jessie Lucile Polson.

At 7:30 p. m. the pastor preached on the subject of "Popular Public Opinion," using as a text Matt. 16:24.

At present is preaching at both of the churches on the 1st Sunday night.

## RED CROSS HAS SPENT \$85,118 FOR FLOOD RELIEF IN ELBA AREA

\$56,866 Has Been Spent For Rehabilitation Work and \$30,342 For Emergency Relief; 728 Cases of Families Have Been Closed.

More money has been expended in rehabilitation work by the American Red Cross in the Elba community as a result of the recent flood, than in any other single area affected by that disaster in Alabama. C. H. McFarland, Red Cross area director, announced this week.

Expenditures under this head totaled \$56,866 up to Wednesday. All together the Red Cross has expended in round numbers \$85,118 up to Wednesday in Elba and vicinity. This includes \$30,342 spent for emergency relief earlier in the history of the operations here.

Work in behalf of the flood victims is progressing rapidly, as 728 cases of families have been closed, and a total of 297 families have been closed with the relief organization. Out of the number of cases closed, approximately 90 per cent received help from the relief funds, either in the form of emergency aid, rehabilitation or both.

The reconstruction work includes the distribution of food, feed for live stock and poultry, clothing, medical aid, school, household furnishings, buildings and repairs to homes and barns, live stock and poultry, farm implements and other necessary relief to assist the families in regaining self supporting status in the community.

The awards are made on the basis of need and not loss. The needs of families are being considered, and necessary aid is being extended on the basis of a study of each case. It is thought that the rehabilitation program, in this County, will be brought to a close sometime in the month of June, or early July.

Experienced Red Cross workers in the Elba community have declared that the cases they handled in this section required greater care, and were more varied in their requirements than any they had ever worked on previously.

Besides the families helped, McFarland stated that virtually all the building cases will have been handled by the end of the month of June.

It was pointed out that much of the progress with which the operations have been conducted, is due to the cooperation of the community thru its advisory committee of local citizens. This committee, with the exception of a few new members, is the same which has functioned in relief and rehabilitation since the start.

Members include W. M. Brunson, Chairman; Maynor R. L. Cooper, Mosley W. W. Rainer, J. M. Garrett, H. G. Johnson, Miss Jean Langston, all of Elba; Dr. W. A. Stanley, Enterprise; and Col. J. G. Hubbard, Troy.

Disaster relief, of which the work in Alabama is an instance, is the principal duty of the American Red Cross, as laid down in its charter from the Congress of the United States. While its work in disasters is made possible largely by public contributions at the time of the occurrence, it has been necessary both in Alabama and in a number of other relief operations in various parts of the United States in the past year, for the Red Cross to draw on its reserve funds for sufficient to complete its work in these catastrophes.

In Georgia, for example, where a tornado last month did great damage and killed and injured many people in proportion to population, and in previous disaster of recent years, the public contributions fell short by many thousands of dollars of the amount necessary to carry on adequate relief. The Red Cross announced that from its treasury funds in Washington, it would contribute the money necessary to complete the work, and relief of these regions is proceeding on that basis.

Largely as were the contributions for relief in Alabama, it is expected that the Red Cross will be compelled to draw on its reserve funds for the work in the state is completed to the satisfaction of the Red Cross.

All accounts of the Red Cross are

Dr. C. A. Baore, of the chemistry department of the Alabama Polytechnic Institute, has succeeded in making briquettes of pine sawdust with a fuel value three-fourths that of bituminous coal. He estimated that these briquettes can be manufactured for \$1.64 per ton. Very little machinery is needed and it is feasible for sawmills to manufacture the briquettes.

Mr. D. S. Teel, prominent South-west Coast citizen, was here Monday and dropped in to have his subscription extended.
